PROFILE

UI/UX and product designer with 7+ years in digital products, ad tech and software, including 2 years of UX work on publisher client projects at MediaMint. Since relocating to the UK in 2024, I have designed Kalyanam, a live wedding-planning app, end to end alongside an engineer, and I am now leading product design on InterviewOS, an AI interview simulator. I combine user research, Figma prototyping and design systems with a practical understanding of performance data, commercial requirements and how designs get built.

SKILLS

UX & Product Design: User Research • Personas • Competitor Analysis • Information Architecture • User Flows • Wireframing • Prototyping • Usability Testing • UAT • Responsive Design • Accessibility (WCAG 2.1 AA)

Figma & UI: Figma • Auto Layout • Constraints • Components & Variants • Design Systems & Tokens • Light/Dark Theming • Developer Handoff

Product & Data: Data Analysis • A/B Testing • Stakeholder Collaboration • Prioritisation • AI-assisted Design

Technical: HTML • CSS • JavaScript • React.js • GitHub • JIRA

PRODUCT DESIGN EXPERIENCE

Relocated to the UK in February 2024 and moved fully into UX: Google UX Design Professional Certificate, Figma training and front-end development, followed by live product work with an engineer.

INTERVIEWOS | Product Designer, UX & UAT

AI interview simulation platform | UK | Sep 2026 – Present

- Leading product design, UX and user acceptance testing for an AI platform that lets candidates practise realistic job interviews, working alongside the engineer from the start of the build.

KALYANAM | Product Owner & Product Designer

Live wedding-planning web app (PWA) | UK | Aug 2025 – Sep 2026 | omgr.github.io/kalyanam

- Originated the product concept: a wedding planner that already knows each family's rituals, keeps data on family devices and lets relatives update it without creating accounts.
- Researched with recently married families, reviewed real wedding spreadsheets and ran a competitor analysis of mainstream planners (The Knot, WeddingWire, Zola) to find where they fail Indian weddings.
- Defined three personas (Organiser, Helper, Couple), the information architecture and user flows, including an onboarding path that produces a usable plan in under two minutes.
- Scoped the feature set with the engineer and wrote the delivery work plan before build began in January 2026; the product launched in September 2026.
- Designed ritual templates for five wedding traditions as core product objects, each ceremony carrying its local-script name, significance and required items.
- Authored the design system end to end: colour tokens for light and dark themes, multi-script typography (Telugu, Devanagari, Arabic), components and motion, targeting WCAG 2.1 AA.
- Ran usability testing over multiple rounds and UAT against a real wedding plan: 20 ceremonies, 16 budget categories and a live guest list.

FRUGAL | UX Case Study, Personal Finance & Budgeting App

Self-directed project | 2025

- Conducted user research into budgeting behaviour, identifying needs around financial guidance, confidence and feature discoverability.
- Defined information architecture and user flows, progressing from low-fidelity wireframes to high-fidelity interactive prototypes in Figma.
- Ran an unmoderated usability study with 5 participants and iterated navigation and key journeys on the findings.
- Built reusable UI patterns and extended the design across mobile and responsive web.

PROFESSIONAL EXPERIENCE

MEDIAMINT | Subject Matter Expert

Hyderabad, India | Oct 2020 – Jan 2024 | Promoted Associate II → Associate III → Subject Matter Expert

Joined in Ad Operations and progressed to Subject Matter Expert across publisher platforms, advertising operations, website performance and client requirements. As the company began exploring UX initiatives for existing clients, I contributed to pilot UX projects and took on increasingly design-focused responsibilities, applying my knowledge of publisher business models, advertising requirements and performance data to website structure, user journeys and responsive experiences.

Selected UX Client Projects

Technology Publishing Platform — Website Redesign

- Contributed to the redesign of an established technology publishing platform, working across content hierarchy, article layouts and responsive experiences.
- Helped structure article pages around both editorial content and advertising requirements, balancing readability with the publisher's commercial needs.
- Contributed to a high-impact advertising experience that provided strong initial campaign visibility and transitioned to a more compact state as users moved through content.
- Collaborated with design, development and business teams to refine layouts based on user, commercial and technical requirements.

Recipe & Shop Platform — Website Redesign

- Contributed to the redesign of an established recipe and e-commerce platform, working across recipe content, product discovery and responsive layouts.
- Improved Shop browsing through a structured grid-based layout, while keeping the commerce experience intentionally ad-free and focused on product discovery.
- Helped restructure free recipe pages around recipe imagery, ingredients, editorial content, advertising and supporting media.
- Contributed to a contextual video experience that surfaced sponsored recipe content relevant to the article being viewed.
- Contributed to content-to-commerce pathways by connecting relevant cookware used in recipes with corresponding Shop product details.

Additional Responsibilities

- Analysed user behaviour, engagement patterns and page performance to identify potential usability, navigation and layout issues.
- Created and refined wireframes, page layouts and interactive prototypes in Figma based on business and experience requirements.
- Presented design recommendations to stakeholders and collaborated with developers through implementation and optimisation.
- Served as an SME across client onboarding, troubleshooting, process documentation and cross-functional training.

HCL TECHNOLOGIES | Senior Analyst

Hyderabad, India | Aug 2019 – Sep 2020 | Google Publisher Ad Operations team

- Analysed and resolved delivery and performance issues for US-based publishers, using data and root-cause analysis to improve platform performance.
- Collaborated with engineering, escalation and account-management teams to resolve complex issues and improve operational workflows.

VALUELABS | Software Engineer

Hyderabad, India | May 2016 – Jul 2019 | Promoted Trainee Software Engineer → Software Engineer

- Developed and maintained data-driven features, integrations and automation in Salesforce CRM, testing releases and resolving system and data issues.
- Worked with users, developers and stakeholders to understand workflows and translate business requirements into technical solutions.

EDUCATION & CERTIFICATIONS

Bachelor of Technology, Information Technology | Jawaharlal Nehru Technological University, Anantapur | 2011 – 2015

Google UX Design Professional Certificate | Google via Coursera | Jan 2026 | [Verify on Credly](#)

Figma UI UX Design Essentials | Bring Your Own Laptop | Aug 2026

AWARDS

Employee of the Quarter ×3, Spot Award and Client's Favourite Award (MediaMint) • Diamond Award (HCL Technologies)
